

SION REHABILITATION CLINIC

photos: Suva, Robert Hofer - 1001

Suva has its own rehabilitation clinics designed to treat the physical and psychological consequences of accidents and their socio-professional aspects. The purpose of this infrastructure is to facilitate the reintegration of injured individuals into active society.

The clinic is located on the plain of Champsec adjacent to the Sion Regional Hospital with which it cooperates. These buildings were built in three main stages over twenty years. They consist of inpatient buildings, sports halls, an indoor swimming pool and many complementary functions, providing physical and vocational rehabilitation care.
