## CHUV, TRANSFORMATIONS DURING SERVICE

The CHUV is part of the select group of five university hospitals in Switzerland and plays a leading role in European healthcare and research. The 19 interconnected volumes live round the clock – a city within the city – inhabited by more than 9,000 employees.

As of 2000, Tekhne in collaboration with groups of architects and engineers, planned and carried out several projects in the hospital building commissioned in 1982. Supervising construction work in fully functioning buildings raises serious issues with respect to logistics, hygiene and technical cohabitation with adjacent sectors and levels. This type of project requires strong project management and extreme attention to the preparation of works.

### CLIENT

CHUV construction, engineering, technical and safety department

—

### CASUALTY UNIT

Itten+Brechbühl, Lausanne  
7-stage project  
2000-2007  
CHF 23 million

### SEVERE BURNS UNIT
