

## MON IDEE COMMUNAUX D'AMBILLY IN THONEX

MICA -Mon Idée Communaux d'Ambilly- is a large project which comprises a housing complex of 2,250 units in addition to 15% surface area for activities and services. A set of successive urban spaces are laid out either side of a central alley. The project seeks to create a landscape of large folded buildings whose form varies between a typology of bars and islands. Each urban element is organized around a central public space, completed by allotment gardens around the periphery. As part of the first phase of construction, Tekhne will manage the construction of the Salève and Mont-Blanc buildings which house 173 dwellings, 34 of which are adaptable for people with reduced mobility, and 700 parking spaces.
