## GALERIE-JARDIN BUILDING IN GRAND-LANCY

views: atelier bonnet - 1263

The development project for the Surville district, particularly well served by Geneva public transport, provides for the construction of a group of buildings in a large wooded park.

To take advantage of this special environment, the 46 dwelling units in the Galerie-Jardin building have a generous planted terrace facing the wooded park. The construction meets the high energy performance standards of the City of Geneva.
