## NEW HEADQUARTERS OF THE ECA IN LAUSANNE

The ECA, the cantonal fire and natural elements insurance company, wishes to regroup its 250 employees, the emergency health foundation and the Vaud police central call and intervention center in the Grangette historic park. The building is designed like Russian dolls, with traffic relegated to the periphery and the various parking areas, call centers, reception area and offices superimposed on each other in layers that open out onto a tree-lined courtyard at the center of the project.
