

MEDICAL-SOCIAL FACILITY IN VILLARS-SUR-GLANE

views: 3DM - 1268

The Sarine medical center benefits from its proximity to the cantonal hospital.

The project involves the extensive transformation of, and extension to, existing buildings to accommodate 104 residents, day care center, kitchen, ambulance and administration services. The objective of this multi-phase transformation is to requalify the entire complexe by seeking harmony between existing and proposed structures, all the while keeping the medical center operational.
