

PLAINES-DU-LOUP ECOQUARTER IN LAUSANNE

views: meier + associés - 1254.2

Developed by means of an interactive design process, the Plaines-du-Loup site will accommodate an urban ensemble comprising of 11,000 inhabitants/employees, green open spaces, sports facilities and new public transport. The different urban elements in the masterplan are subject to distinct development processes.

On the northern edge of urban space B, a bar consisting of 4 blocks connected by stairs and open passageways, comprises 78 dwellings. A community lifestyle is encouraged with a rich program of activities: games library, bar, workshops, guest rooms, community spaces and laundries. The construction, with a mixed wood-concrete structure, meets high energy performance standards.
