

MARCELIN EDUCATIONAL CENTER AT MORGES

photos: Thomas Jantscher - 1002

The Marcelin school complex is located on a wine-growing plateau overlooking the town of Morges. Situated around the Agrilogie School of Agriculture, the program of approximately 80 classrooms combines the Morges professional teaching center, the Morges gymnasium and a triple gymnastics hall. This versatile environment enables meetings and exchanges between students from varying educational backgrounds. The three buildings are distributed around a vast landscaped courtyard and, together with the pre-existing buildings, form a large educational complex at the periphery of the agricultural zone.
