

## LE ROLLIET SCHOOL IN PLAN-LES-OUATES

The primary school is part of the large urban development of the Cherpines district.

The project brief comprises 16 rooms, a school restaurant, extracurricular premises and a double gym. The school is organized as a cloister on two levels, around a central recreation area. The modular prefabricated timber construction has a warm appearance. The building meets the high standards of sustainable design and energy performance targeted by the municipality.
